NEWS RELEASE

March 6, 2009

EnerGulf Comments on Namibian Project

(HOUSTON) EnerGulf Resources Inc. (TSXV: ENG) EnerGulf reports that it has not yet received results from Sintezneftegaz Namibia Ltd., the operator of the Kunene #1 drilled in Block 1711, deep offshore Namibia this past summer. EnerGulf has a 10% working interest in the block and the well.

A Namibian news article was posted online in a North American discussion forum today, and the price of the Company's shares has increased significantly. That article states that an official of NAMCOR believes that Sintezneftegaz representatives will visit with the Ministry of Mines and Energy in Namibia by the end of the first quarter 2009, and the government may then receive a report of the well results. The Company has received no notice of the Operator's above mentioned planned visit to provide the government with well results and further, is not aware of any undisclosed information which may explain today's increase in trading price or volume. The government of Namibia has classified the Kunene No. 1 as a "tight hole," meaning no information regarding the well may be released until such time as the Namibian government determines to make the information public. Further, the Operator has requested additional funds from EnerGulf with respect to EnerGulf's cost share relating to the 2008 work program. EnerGulf objects to various invoices as not allocable to EnerGulf, and is requesting credit for its share of deposits paid and reimbursed to the Operator, and is now awaiting reconciliation of its share of various operational expenses for 2008.

EnerGulf Resources Inc. is a publicly traded international oil and gas exploration company focused on maximizing shareholder value by targeting high impact opportunities in the world's most prospective hydrocarbon regions.

On Behalf of the Board of Directors of
EnerGulf Resources Inc.

"Jeff Greenblum", COB/CEO
