NEWS RELEASE

November 28, 2007

CORPORATE UPDATE

(HOUSTON) EnerGulf Resources Inc. (TSXV: ENG) (the “Company”) is providing hereby a corporate update. The Company has become aware of increased market activity and notes that there are no undisclosed material changes in the Company’s affairs.

The Company continues to work on advancing its Namibia Offshore Block 1711 project. The Joint Operating Committee comprised of the participating parties in the Block, including EnerGulf, are currently meeting in Moscow. The Technical and Operating committees are working to determine the optimum drilling location, potential drilling schedule and budget for the first exploration oil and gas well on the Block . The Company will report material updates as they become available. With respect to the Lotshi Block project in the Democratic Republic of Congo (“DRC”), the Company continues to await Presidential Decree to formalize the Oil and Gas Production Sharing Contract granted to it by the Ministry of Energy of the DRC.

Block 1711 is situated in the Namibe basin off the northern coast of Namibia along the international boundary with Angola. The two separate exploration prospects, the Kunene and Hartmann, have been identified by extensive modern seismic data on the 893,100 hectare (2.2 million acre) block. Based on a Prospective Resource Assessment provided by Netherland Sewell & Associates, Inc. (see news release dated September 8, 2006) the partners are targeting a potential multi-billion barrel oil and gas resource on Block 1711. The Company has a 10% working interest in Block 1711. The Lotshi Block covers approximately 475 square km in the onshore coastal salt basin of western DRC and is contiguous to the highly prospective Cabinda area of Angola.

On Behalf of the Board of Directors of
